# INSTALLATION

## System Requirements

- 1 Gb free hard disc space, DVD drive
- Windows XP, PIII/Athlon 1,8GHz with 512 Mb of Ram
- Mac OS X 10.3.9, G4 1GHz with 512 Mb of Ram
- A working EZdrummer installation

## Windows

Run the *EZX VintageRock Installer* located in the `\Install\PC\` folder of the DVD and follow the instructions.

The sounds and accompanying MIDI will be installed automatically in the appropriate location for your EZdrummer installation and directly accessible from the program (see the main EZdrummer manual for details on loading expansion kits).

To uninstall simply re-run the installer located on the media that came with this product or use your operating system's removal facility.

## Macintosh

Run the *EZX VintageRock Installer* located in the `/Install/MAC/` folder of the DVD and follow instructions. Please ensure you are logged in as an administrator before proceeding.

The sounds and accompanying MIDI will be installed automatically in the appropriate location for your EZdrummer installation and directly accessible from the program (see the main EZdrummer manual for details on loading expansion kits).

To uninstall simply run the uninstaller provided and select the components you wish to remove (sounds and/or MIDI library).

## Registration and support

Please take the time to register your copy of EZdrummer at the Toontrack website for exclusive additional MIDI files and resources.

We also recommend installing the latest version of EZdrummer available for best results. You can find the latest version at <http://www.toontrack.com/updates.html>

If you require assistance in installing or accessing this expansion set please contact a support advisor using the form located at <http://www.ezdrummer.com/support/> or visit the support forum for further help (link at url above).
